SUMMARY

Software engineer who builds the app, the API and the server it runs on: Flutter, Node.js, MongoDB, React, AWS. Built the Massclick app from its first commit and works on its API, web and servers; previously led mobile at Digihope Technologies.

EXPERIENCE

Software Engineer — Massclick

2026 - Present

Tiruchirappalli · Local-search platform for Tamil Nadu · 1,557 commits across the web platform and the mobile app

- **Mobile:** built the Flutter app from the first commit to v2.1.1 on Android and iOS, in English and Tamil (263 of 264 commits; Riverpod, Socket.IO, FCM), and shipped ~25 items from a 20-feature web-parity audit.
- **Search:** built the search engine behind every query: category intent, MongoDB text and distance ranking over ~18,300 locations and ~11,000 businesses, with pincode and district fallbacks. Trichy locality geo coverage 7.8% → 89.3%.
- **Security:** stopped an SMS-pumping attack on the OTP endpoint (9,907 fraudulent SMS, ₹1,882): blocked at the edge in minutes, then shipped true client IP, per-number and daily caps, verify lockout and a decoy honeypot. It now costs ₹0.
- **Database:** moved every production MongoDB database to a dedicated server with ~90 s of cutover downtime, with nightly backups, a SHA-256-verified off-box copy and Prometheus/Grafana monitoring.
- **Storage:** re-keyed 36,187 S3 objects (1.77 GB) to an owner-based layout: 33,096 of 33,096 copied, 0 failed, nothing deleted; plan, verify, resume and rollback tooling, and a lint gate over 51 migrated call sites.
- **Performance & SEO:** cut the business-page bundle 173 → 92 KB and server-rendered the hero so mobile LCP paints before JS; closed a crawl trap of ~120–198k junk Googlebot requests a day (non-410 errors 6–7% → ~0.1%).
- **Payments:** PhonePe gateway, Pay2All BBPS bill fetch and recharge, and QR-verified certificates issued on payment.

Freelance Mobile Developer — VandiZone (direct client)

Ongoing

- Built two Flutter + Firebase apps, Customer Booking and Captain/Owner, synced live via Realtime Database and Firestore.
- Google Maps live vehicle tracking, route navigation and trip history; phone and email sign-in; FCM trip alerts.

Head of Mobile App Development — Digihope Technologies

2025 - 2026

- Led cross-platform Flutter apps for Android and iOS: architecture, state management and API integration, working with the PHP and Express.js backend teams.
- Owned every release on Play Console, App Store and TestFlight, from testing tracks to production and policy compliance; reduced crash rates through continuous monitoring and mentored junior developers.
- Built **Veezzo**, a food-delivery app with live order tracking and payments on AWS API Gateway, Lambda and S3.

Intern, Flutter & React — Syuap Tech Solution

2024

- Six months during the M.Sc: three on Flutter mobile apps, then three on React, in Agile sprints on deployed apps.
- Built **Vmark**, multi-seller e-commerce in React, Express and Node.js: seller accounts, auth and product CRUD over REST.

SKILLS

Mobile	Flutter, Dart, Riverpod, Firebase (Auth, Firestore, FCM), Google Maps, Play Console, App Store, TestFlight
Backend	Node.js, Express, MongoDB, Redis, Socket.IO, REST APIs, WebSockets, webhooks, Laravel / PHP
Web	React, Next.js, JavaScript, HTML, CSS, server-side rendering, Core Web Vitals, technical SEO
Cloud & ops	AWS (S3, EC2, Lambda, API Gateway), Docker, nginx, Linux, GitHub Actions, Prometheus, Grafana
Languages	Dart, JavaScript, Python, PHP, Java, C++

EDUCATION

M.Sc Computer Science — Bishop Heber College, Tiruchirappalli · GPA 8.6 — 2023 - 2025

B.Sc Computer Science — National College of Arts and Science, Tiruchirappalli · GPA 8.4 — 2020 - 2023
