SKILLS

Mobile
Flutter, Dart, Riverpod, Firebase (Auth, Firestore, FCM), Google Maps, Play Console, App Store, TestFlight

Backend
Node.js, Express, MongoDB, Redis, Socket.IO, REST APIs, WebSockets, webhooks, Laravel / PHP

Web
React, Next.js, JavaScript, HTML, CSS, server-side rendering, Core Web Vitals, technical SEO

Cloud & ops
AWS (S3, EC2, Lambda, API Gateway), Docker, nginx, Linux, GitHub Actions, Prometheus, Grafana

Languages
Dart, JavaScript, Python, PHP, Java, C++

EDUCATION

M.Sc Computer Science
Bishop Heber College, Tiruchirappalli
2023 – 2025 · GPA 8.6

B.Sc Computer Science
National College of Arts and Science, Tiruchirappalli
2020 – 2023 · GPA 8.4

RECOGNITION

- Organiser, Naco Tech 2022 · and its Python quiz
- Second prize, aptitude test · Bishop Heber College
- Student of the Year 2020 · Lakshmi Matric HSS

PROFILE

Software engineer who builds the app, the API and the server it runs on: Flutter, Node.js, MongoDB, React and AWS. Built the Massclick mobile app from its first commit and works across its API, web and production servers. Builds VandiZone, a vehicle-hire marketplace, end to end on my own. Previously led mobile development at Digihope Technologies, shipping Flutter apps to the Play Store and App Store.

EXPERIENCE

Software Engineer — 2026 – Present

Massclick, Tiruchirappalli · local-search platform for Tamil Nadu · 1,557 commits

- **Mobile:** built the Flutter app from the first commit to v2.1.1 for Android + iOS, in English + Tamil (263 of 264 commits); shipped ~25 items from a 20-feature web-parity audit.
- **Search:** built the search engine: category intent, then MongoDB text and distance ranking over ~18,300 locations and ~11,000 businesses; Trichy locality coordinates 7.8% → 89.3%.
- **Security:** stopped an SMS-pumping attack on the OTP endpoint (9,907 fraudulent SMS, ₹1,882): blocked at the edge in minutes, then shipped true client IP, per-number and daily caps, verify lockout and a decoy honeypot. It now costs ₹0.
- **Infrastructure:** moved production MongoDB to its own server with ~90 s of cutover downtime (SHA-256-verified off-box backups, monitoring repointed), and re-keyed 36,187 S3 objects (33,096 of 33,096, 0 failed) behind verify, resume and rollback tooling.
- **Web:** business-page JS 173 → 92 KB and a server-rendered hero so mobile LCP paints before JS; closed a crawl trap of ~120–198k junk Googlebot hits/day; shipped PhonePe and Pay2All BBPS.

Freelance Full-Stack Engineer — Ongoing

VandiZone · direct client · marketplace for hiring JCBs, cranes and goods trucks · sole developer: two Flutter apps, the office console and the website, on Firebase and Cloud Functions

- **Dispatch and proof of work:** a job is offered only to on-duty, verified drivers in range whose machine fits the load (payload, body type, trailer length, crane lift), then runs as gated stages proved by GPS, 4-digit customer codes, photos, weighbridge slips and e-way bills.
- **Money:** two pricing engines — hourly billing recomputed from real worked time, and a blind counter-offer auction for trucks — with Razorpay, wallets, commission payouts, GST invoicing (CGST/SGST or IGST) and cancellation terms frozen onto each booking.
- **Live operations:** tracking that keeps reporting through a locked screen, share links stripped of personal data, in-app chat, a public load board, and a ~20-module office console that changes rates and forces app updates with no release.

Head of Mobile App Development — 2025 – 2026

Digihope Technologies, Tiruchirappalli

- Led cross-platform Flutter apps for Android and iOS: architecture, state management and API integration, with the PHP and Express.js backend teams.
- Owned every Play Console, App Store and TestFlight release, from testing tracks to production and compliance; cut crash rates and mentored junior developers.
- Built **Veezzo**, food delivery with live tracking and payments, on AWS Lambda and S3.

Intern, Flutter & React — 2024

Syuap Tech Solution, Tiruchirappalli · six months during the M.Sc

- Three months of Flutter, then three of React, in Agile sprints on deployed apps.
- Built **Vmark**, multi-seller e-commerce in React, Express and Node.js: seller accounts, auth and product CRUD over REST.
